## Course information

---

**Course Website:** at [my.nes.ru](http://my.nes.ru)

**Instructor's Office Hours:** TBA

**Class Time:** Th 17:15-18:45 (mod 1)

**Room Number:** 247 Beta (online)

## Course description

---

The ultimate goal of this course is to familiarize students with the main principles and components of economic research and prepare them for writing term papers and master theses. Students will learn how research is made, starting from an idea, its development, and shaping it into a readable paper. In class, students will learn how to write literature reviews and referee reports evaluating work of others. In the second part of the course students will present their own research and discuss presentations of others. A part of the course will be devoted to professional ethics, rules of citation and quotation, and avoiding plagiarism.

## Course requirements, grading, and attendance policies

---

Grading policy: Each part of the course is evaluated on Pass/ Fail scale.

The course has zero weight in the transcript, but Pass for the Methodological Seminar 1 is required for passing the Research Seminar and is also a pre-requisite for the Methodological Seminar 2 in Module 4. Pass for the full sequence is required in order to be able to defend master thesis.

To obtain the passing grade students should submit preliminary and final referee reports on time in Module 1, present their own thesis and actively evaluate work of others in Module 4, and attend at least 80% of lectures in both Modules.

## Course contents

---

The following topics are to be covered during the course.

1. How and where to start on your research?
2. What does it mean to be an academic economist? Structure of the profession, career incentives and opportunities.
3. What does it mean to conduct a good quality research? How research is evaluated and can be evaluated? Methodology of research. Publication process.

4. How to write a good paper? Structure of a research paper. Why it is important to identify your contribution?
5. Working with data.
6. How to find and present relevant literature? Writing comprehensive literature reviews.
7. How to analyze and evaluate work of others? Writing referee reports.
8. How to make presentations?
9. Academic ethics. Plagiarism.

The timeline for your referee reports in Module 1 is:

Week 2: you will be assigned papers to referee

Week 5: preliminary reports are due

Week 7: final reports are due

### **Sample tasks for course evaluation**

---

Please submit a critical assessment of the paper assigned to you (e.g. <http://workspace.unpan.org/sites/Internet/Documents/UNPAN93963.pdf>). You are expected to provide a short summary of the paper, including its research question, its approach, and main findings; then your own evaluation of the value added of the paper (quality of contributions) relative to the existing literature; and the overall assessment of strengths and weaknesses of the paper.

Please prepare a short (no more than 15 minutes) presentation describing the motivation, research question, and the main results of your master thesis.

### **Course materials**

---

#### **Required textbooks and materials**

Thomson, William (2011). *A Guide for the Young Economist*. MIT Press, 2ed; or 1ed (2001)

Hamermesh, Daniel (2007). "How To Publish in Top Journals." Mimeo, University of Texas at Austin.

Dower, Paul (2008) "Plagiarism and Proper Citation." Mimeo, New Economic School.

Hamermesh, Dan (2007). "Viewpoint: Replication in economics." *Canadian Journal of Economics*.

#### **Additional materials**

Krugman, Paul (1998). "Two Cheers for Formalism." *Economic Journal*.

McCloskey, Donald (1983). "The Rhetoric of Economics." *Journal of Economic Literature*.
