## Course description

---

This course provides an introduction to Corporate Governance from an economic perspective. Shleifer and Vishny (1997) give a simple definition in their survey: “Corporate Governance deals with the ways in which suppliers of finance to corporations assure themselves of getting a return on their investment.” We mostly limit ourselves to this so-called shareholder view of corporate governance but discuss also the broader stakeholder view that includes employees, suppliers, creditors and society as stakeholders in a firm.

The need for corporate governance stems from conflicts of interest between shareholders and managers (agency conflict of type I) or between large and small shareholders (agency conflict of type II). To mitigate such agency costs, a variety of mechanisms can be used: monitoring by a board of directors, the managerial labor market, incentive contracts for top managers, large shareholders, the threat of takeover, and government regulation to protect investors, among others. We study each of these mechanisms of corporate governance in detail.

Classes will be a mix of lectures, case discussions, and short presentations. Most of the topics are discussed in an international context, but we will refer to the Russian reality and present some data on boards of directors and ownership structure in Russian companies.

## Course requirements, grading, and attendance policies

---

Requirements: It is recommended to take Corporate Finance before this course.

The course grade is composed of five subgrades with different weights.

1. Class participation (15%). This course requires quite a bit of reading. We will discuss the topics based on the readings that I indicate before each class. I expect active participation from each student. I will assign papers from the reading list whose main ideas one student should present in 5-10 minutes. This will develop a special type of presentation skill – summarizing a potentially complex issue in a very short time. Obviously, a necessary condition for active class participation is your presence.
2. Class presentation and submission of a data search and analysis assignment (10%).
3. Class presentation and write-up of one out of two case studies (20%). I will take into account your preferences for one of the two cases but reserve the right to assign a case if the distribution is too unequal.
4. Critical discussion of the case study presentation of another group that I will assign to you 1-2 days before the presentation in class (5%). This will be the case that you did *not* choose under point 3. Apart from providing your comments in class, you need to submit a one-page essay or at least four slides.
5. Final exam (50%).

Presentations and discussions (points 2 to 4) are evaluated individually or for groups of two students. In order to pass the course, you need to pass two thresholds: You need to get a minimum of 35% of points in the exam and 50% for the course in total.

Class attendance is highly recommended to pass the exam. It is strictly required on those days when you or your group is scheduled for a presentation or discussion.

## Course material

### Required textbooks and material

David F. Larcker, Brian Tayan, Corporate Governance Matters: A Closer Look at Organizational Choices and Their Consequences (3<sup>rd</sup> edition), Pearson 2020 **(LT)**.

Papers indicated as required readings in the section “Course contents”.

### Additional material

See references in the section “Course contents”.

7

**The Market for Corporate Control**

- Stock Market Evaluation of M&A
- Takeover defenses

Required readings:

- LT Ch. 11
- Karpoff, Jonathan M. and Michael D. Wittry (2024), Corporate takeover defenses, in: Handbook of Corporate Finance, edited by David J. Denis, 410-454.

Recommended readings:

- Stegemoller, Mike (2008), Corporate Takeovers and Restructurings, in: Corporate Governance – A Synthesis of Theory, Research and Practice, edited by H. Kent Baker and Ronald Anderson, Wiley, 517-533.

**Measurement and Regulation of Corporate Governance**

- Investor protection at the country level
- Corporate governance and ESG indices
- Corporate Governance standards and requirements for stock market listings
- The law and finance literature

Required readings:

- LT Ch. 13
- La Porta, Rafael, Florencio Lopez-de-Silanes, and Andrei Shleifer (2013), Law and Finance After a Decade of Research, Handbook of the Economics of Finance, edited by George M. Constantinides, Milton Harris and Rene M. Stulz, Volume 2, Part A, 425-491.
- Aminadav, Gur and Elias Papaioannou (2020), Corporate Control around the World, *The Journal of Finance*, 1191-1246, Section 5.

Recommended readings:

- Aggarwal, Reena, Isil Erel, René Stulz and Rohan Williamson (2009), Differences in Governance Practices between U. S. and Foreign Firms: Measurement, Causes, and Consequences, *The Review of Financial Studies*, 22 (8), 3131-3169.

The schedule and readings are preliminary. Assignments and readings (except for the Parmalat and GE case studies) can be changed during the course.

**Description of course methodology**

The course will cover theoretical models of corporate governance, empirical research and case studies. It will be taught by a combination of lectures, case discussions, and short presentations of papers and relevant data.

**Academic integrity policy**

Cheating, plagiarism, and any other violations of academic ethics are not tolerated at NES.
